

Portable Wash Pad Rental

Dirt Works Environmental, LLC offers quick-deploying portable wash containment systems that can be set up quickly and provide 100% containment to meet the needs of industries that desire to comply with today's strict environmental laws.

We lease two portable wash pad systems to meet your primary and secondary containment needs:

Greenhead Roll-off Wash Pad:

- Folding roll-off pad forms a 17'x22' wash pad with no bolts or assembly required
- Available with or without walls and ramps
- Transports easily on a standard roll-off truck and sets up in minutes
- Water and muck fall directly through the floor so no standing in mud while washing
- Can be used without additional pumps or tanks thanks to its holding capacity of 2,000 gallons
- Also great for secondary containment
- Built very tough with heavy construction equipment in mind
- Can be connected to water reclaim system
- Patent Pending

Daily, Weekly, Monthly & Long Term Rental

Time Saving
& Reliable

Heavy Duty &
Highly Portable

Customized Sizing
& Installation

Efficient &
Environmentally Friendly

Hydropad Portable Wash Pad:

- Modular wash pad system sized from 8'x20' to 40'x96'
- Available with or without walls and ramps
- Patented side gutter allows water and muck to be shoveled or flushed out while still in use
- Very durable and can be relocated
- Rated to hold 16 tons per axle
- Can be connected to water reclaim system
